

Round gate damper with pneumatic actuator

GKML/GKM

Description

The GKML/GKM round gate dampers with pneumatic actuators are designed for air ventilation and dust extraction systems. The design of the gate damper makes it easier to clean the ductwork as there are no elements within the clear opening. The gate damper provides a tight seal when closed or full opening.

The solenoid valve of the pneumatic actuator is available for 230 V AC, 24 V AC or 24 V DC power supply - to be specified when ordering.

Recommended installation options:

- GKML/GKM sized ≤ 200 mm in diameter: use 1 actuator
- GKML/GKM sized > 200 mm in diameter: use 2 actuators

GKM - gate damper with actuator and bare flanges

GKML - gate damper with actuator and EPDM gaskets at the flanges, air tightness class D acc. to EN12237

Technical parameters

Air cylinder:

- control pressure: 0,6 MPa (6 bar)
- max. ambient temp: -20°C to 80°C
- operating medium: treated air

Solenoid valve:

- control pressure: max 7bar
- ambient temperature: max 50°C
- supply voltage: 230V
- Ingress protection: IP65

Available materials — Product code examples

- GKML-... - galvanized steel sheet
- GKML-K... - 1.4301/304 stainless steel sheet
- GKML-K-...-316L - 1.4404/316L stainless steel sheet
- GKML-A... - aluminium sheet

Product code example

Product code: **GKML - aaa**
