

SPIRAL duct boxes

# WOOD-BOX-IPPC

## Description

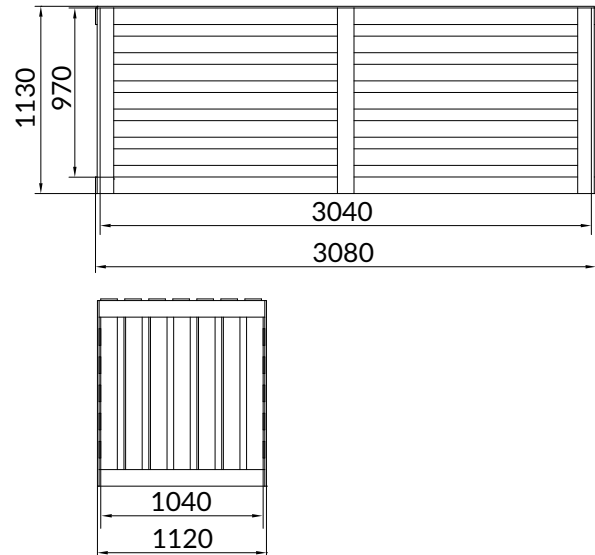

The boxes are designed for transporting SPIRAL round ventilation DUCTS. They are used for diameters from 80 to 315 mm, which, to save space, can be inserted smaller into a larger one up to a maximum of 3 diameters. The box is made of fumigated wood giving the possibility of sea transport. It is possible to stack the boxes on top of each other..
